

Estimating the Impact of Climate Change on Maize Yield in the La Plata Region, Brazil, and Identification of Adaptation Strategies with the Help of Stakeholder and Situation Analysis

By Janine Unger

GRIN Verlag. Paperback. Book Condition: New. Paperback. 88 pages. Dimensions: 8.3in. x 5.8in. x 0.2in. Research Paper from the year 2012 in the subject Geography Earth Science - Meteorology, Aeronomy, Climatology, grade: 1, 3, Humboldt-University of Berlin (Leibniz-Zentrum fr Agrarlandschaftsforschung (ZALF) e. V.), language: English, comment: Gefrdert vom Bundesministerium fr Bildung und Forschung (Projektnummer BRA 11A35) innerhalb des Europäischen Forschungsprojekt CLARIS LPB (Climate Change Assessment and Impact Studies in La Plata Basin) , abstract: Brazil is confronted with a high risk of vulnerability to climate change, not least due to its fragile, biologically diverse ecosystems. Taking into account its size in geographic, demographic and economic dimensions, the adaptation to climate change problems becomes highly complex. Changing rainfall patterns will mean poorer water resources and a reduced water supply. Agriculture will be affected, exacerbating the risk of famines. Less rain will also affect the hydropower supply which provides more than 80 per cent of the electricity Brazil generates. Floods, which are already a serious problem for various regions, may increase. Given abundant natural resources, Brazil started early to establish its energy sector largely on renewables. Therefore, in terms of

Reviews

This is the greatest pdf i actually have go through right up until now. It is actually packed with knowledge and wisdom I found out this book from my dad and i advised this publication to find out.
