TRENDS IN THE BIOLOGY OF FERMENTATIONS FOR FUELS AND CHEMICALS

Book Condition: New. Publisher/Verlag: Springer, Berlin | The growing concern about where energy rich chemicals for the future will come from has stimulated a resurgence of interest in the potentialities of microbial fermentations to assist in meeting anticipated demands for fuels and chemicals. While much attention has been given recently to the early deployment of alcohol production plants and similar currently available technologies, the potential future developments have received much less attention. One of the intentions of the present...

Reviews

I actually started off reading this article ebook. It is writer in simple phrases instead of hard to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
