

## Fetal Alcohol Syndrome: Diagnosis, Epidemiology, Prevention, and Treatment

Filesize: 5.94 MB

### ***Reviews***

*Absolutely essential study pdf. It is written in basic words and phrases rather than hard to understand. I am just happy to tell you that this is basically the finest pdf I actually have studied during my personal lifestyle and can be the very best publication for actually.*

National Academies Press. Paperback. Book Condition: new. BRAND NEW, Fetal Alcohol Syndrome: Diagnosis, Epidemiology, Prevention, and Treatment, Kathleen Stratton, Cynthia J. Howe, Frederick C. Battaglia, Committee to Study Fetal Alcohol Syndrome, Institute of Medicine, It sounds simple: Women who drink while pregnant may give birth to children with defects, so women should not drink during pregnancy. Yet in the 20 years since it was first described in the medical literature, fetal alcohol syndrome (FAS) has proved to be a stubborn problem, with consequences as serious as those of the more widely publicized "crack babies." This volume discusses FAS and other possibly alcohol-related effects from two broad perspectives: diagnosis and surveillance, and prevention and treatment. In addition, it includes several real-life vignettes of FAS children. The committee examines fundamental concepts for setting diagnostic criteria in general, reviews and updates the diagnostic criteria for FAS and related conditions, and explores current research findings and problems associated with FAS epidemiology and surveillance. In addition, the book describes an integrated multidisciplinary approach to research on the prevention and treatment of FAS. The committee Discusses levels of preventive intervention. Reviews available data about women and alcohol abuse and treatment among pregnant women. Explores the psychological and behavioral consequences of FAS at different ages. Examines the current state of knowledge about medical and therapeutic interventions, education efforts, and family support programs. This volume will be of special interest to physicians, nurses, mental health practitioners, school and public health officials, policymakers, researchers, educators, and anyone else involved in serving families and children, especially in high risk populations.
