

Deepwater Horizon Roster Summary Report

By Department of Health and Human Services: Centers for Disease Control and Prevention, National Institute for Occupational Safety and Health (NIOSH)

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. On April 21, 2010, the Deepwater Horizon oil drilling rig in the Gulf of Mexico caught fire and sank, causing crude oil to gush from the well at the sea floor. The leaking well was capped on July 15, 2010, and on September 19, 2010, a relief well was completed. Thousands of workers3 responded to the onshore and offshore cleanup activities. The Unified Area Command reported over 45,000 workers at the height of the response [Unified Area Command 2010]. The National Institute for Occupational Safety and Health (NIOSH) was asked to support the Unified Area Command to establish a systematic roster of workers participating in response cleanup efforts, by obtaining information at the time of training or from safety and on-site supervisory officials. The concept for the worker roster was developed by the Emergency Responder Health Monitoring and Surveillance Interagency Workgroup coordinated by NIOSH [NIOSH 2011]. This group drafted recommendations that roster information be collected prospectively rather than retrospectively, as occurred during the World Trade Center event in 2001, which proved to be difficult and time-consuming. NIOSH developed...
