This item is printed on demand - Print on Demand Titel. - Bachelor Thesis from the year 2009 in the subject Business economics - Company formation, Business Plans, grade: 1,7, University of Mannheim, language: English, abstract: New enterprises are a source of economic growth, innovation, structural change and employment. However, new firms face a serious problem of high mortality subsequent to their entry into the market. Thus the goal of this thesis paper was to identify survival factors of newly founded firms. This incorporated first to identify existing theoretical frameworks of SFR and second to provide insights into some empirical key findings for some important survival factors of newly founded businesses within the existing literature. In the core part of this paper, a crude systematization of success determinants into personal, firm-specific and environmental factors was used. The analysis of literature on firm survival and success factors revealed a mixed picture as different studies came up with contradicting results. Only few key findings were revealed to have consistent results, which are further presented and discussed in this paper. Furthermore, a critical review of the success factor literature revealed also that...
